Organisation and responsibilities for chemicals control in Sweden

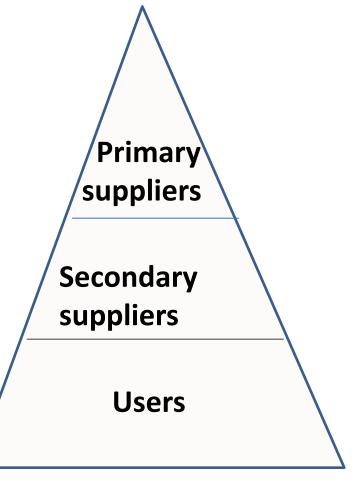

Swedish approach for Chemicals Control

Responsibilities, "placing on the market"

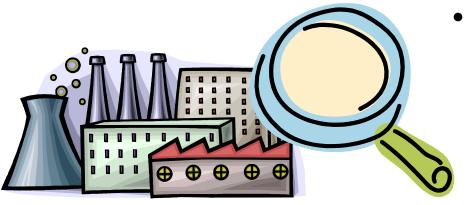

Supervision Guidance/Awareness Swedish Chemicals Agency (Keml) Other Central Authorities County Administration Board (Regional Authority) **Local Authority** Manufacturer/Importer Retailers Users of chemicals **Public**

Control of manufacturer/importer or user?

- Relatively few manufacturers/importers compared to retailers/users
- Manufacturer and importers have better knowledge of a chemicals properties
- Product information should be written by M/I and be given to retailers/users

Inspections

The companies have the responsibility

Keml/Enforcement dep

- Monitor companies' compliance with legislation and regulations (manufacturers/importers)
- Inspections all overSweden

Degree of control

High Low

Pesticides

- Approval
- Registration
- Labelling/SDS
- Enforcement

Chemical products

- Registration
- Labelling/SDS
- Enforcement

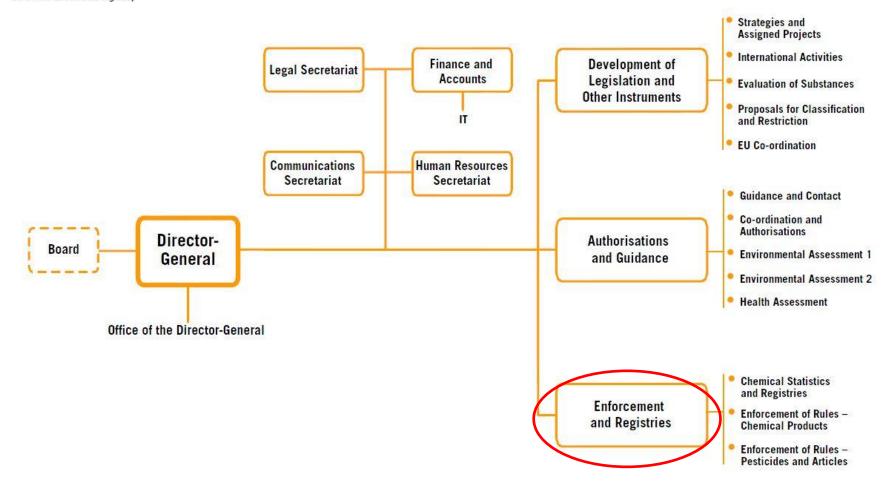

Articles

- Reach Article 33
- Product directives
- Enforcement

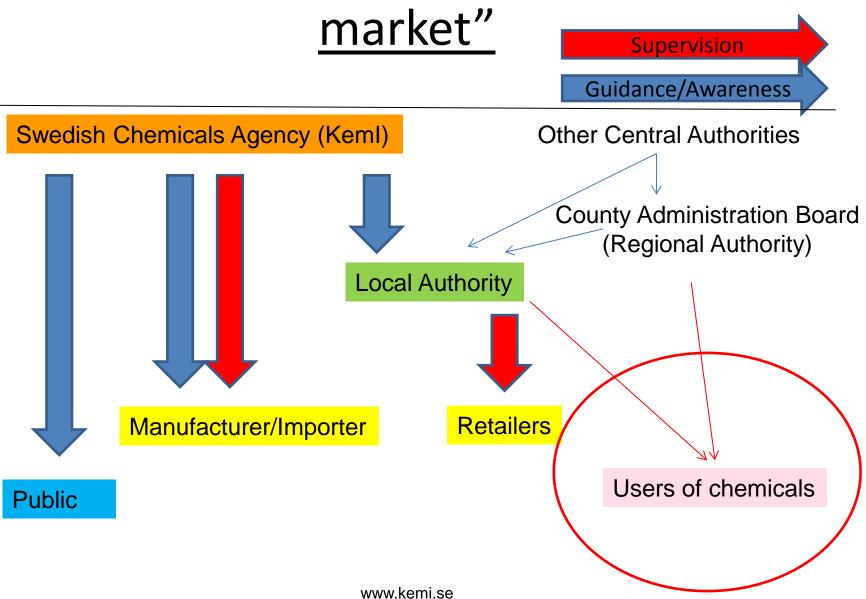

Organisation

2013-06-01 Director-General Secretariats Departments Units

Responsibilities, "placing on the

Environmentally hazardous activities

Category A activities

Refineries, paper and pulp industries, petrochemical operations, automotive manufacturers, waste incineration, the chemical industry, combined heat and power plants, etc.

Category B activities

Sewage treatment plants, textile industry, manufacturing industry, small waste management plants, sawmills, agriculture, food industry, etc.

Category C activities

Petrol stations, small sewage treatment plants, agricultural small holdings, waste sorting facilities, manufacturing industry, etc.

Permits

- Environmental courts for Category A cases
- Environmental appraisal delegations (County Administrative Board) for Category B cases

What is regulated by environmental <u>permits</u>?

- The scope of the business
- Emission limit values to air, ground and water
- Management of chemicals
- Waste management and recycling
- Energy efficiency measures
- Traffic to and from the site (noise)
- Measures to prevent accidents
- •

Category C activities

 Have to be <u>reported</u> before started (6 weeks)

Application form

 County Administration Board and Sewage treatment plant always consulted, perhaps others as well

Example – manufacturing of paper

- A e 21.30
 manufacturing of more than 7 000 ton of paper annually
- B e 21.40
 manufacturing of 100-7 000 ton of paper annually
- C e 21.50
 manufacturing of 10-100 ton of paper annually
